

INSTRUCTOR'S CORNER

ISSUE #8. OCTOBER 13, 2015

CORNER WORKER HAND SIGNALS

During the Drivers meeting on Sunday at our latest HPDs, there were some questions about the hand signals that corner workers use to help communications with each other and with drivers. The ones that drivers should understand, and call upon when needed are shown below. These are the standard SCCA corner worker hand signals.

If you do not remember it, please review Issue # 3 May 1, 2014 which covers the subject of Corner Worker procedure and Response Rules.

As always, comments and suggestions are very welcome. Please send to:
